

# 2024 Tech Transfer Showcase

The Tech Transfer Showcase at BioNTX's iC<sup>3</sup> Life Science Summit provides a prime opportunity to present your most promising intellectual property to a select audience of industry leaders and investors, opening doors to potential collaborations and funding opportunities.

## Who Can Apply?

Texas academic institutions who have technologies available for licensing, collaboration and/or acquisition.

## Why Apply?

### Exposure

Showcasing your technology increases its visibility among potential partners, investors, and collaborators. This exposure can lead to valuable connections and opportunities for collaboration or commercialization.

### Networking

Tech transfer showcases bring together a diverse range of stakeholders, including industry professionals, investors, researchers, and entrepreneurs. Networking at these events can help you build relationships that may lead to partnerships, funding, or further development opportunities.

### Access to Resources

Tech transfer showcases often attract investors, funding organizations, and support services that can provide resources and expertise to help advance your technology. Engaging with these stakeholders at the event can open doors to funding, mentorship, and other forms of support.

## Application Requirements

- Early-stage development and/or most promising intellectual property
- Recommended from their respective Tech Transfer Office
- Non-confidential information only
- Each academic institution can submit up to 2 separate applications

## Testimonials

*"BioNTX has created a unique opportunity for academic faculty to connect with and discuss our technologies with leading industry executives and commercially focused investors and partners. The feedback and conversations are vital to ensure that our basic research efforts align with commercial interests."*

### Venu Varanasi, PhD

Associate Professor, Bone Muscle Research Center, The University of Texas at Arlington
